

FELT CARE + CLEANING

Engineered for high-performance, our PET felt won't pill or shed and doesn't require sealing. Composed a minimum of 60% recycled content, the felt contains subtle color variations and layered tones.

GENERAL MAINTENANCE

The matte heathered texture of PET felt hides dust well, but regular maintenance will help ensure the longevity and appearance of your SABIN products. For periodic dusting and vacuuming, use a vacuum cleaner with a soft brush attachment on a low suction setting to remove dust and debris. Alternatively, you can use a soft cloth to dust the surface.

Extended exposure to direct sunlight may cause color to fade. Use of harsh chemicals, excessive water, and/or heat drying is not recommended and may cause damage.

DISINFECTING

For disinfection, a diluted solution of 5 tablespoons of bleach per 1 gallon of water can be applied as a spray. Alcohol-based disinfectants are also effective and will not cause discoloration.

SPOT CLEANING

Blot the spill and avoid rubbing. For light stains, wipe the affected area gently using a damp cloth. For tougher stains, apply a small amount of mild detergent (such as upholstery cleaner or a gentle soap) to the damp cloth and dab at the stain.
