

MOUNTING OPTIONS

Every space is unique, so we offer a variety of mounting and suspension options to ensure our products integrate seamlessly into your design.

AIRCRAFT CABLE

Compatible with strut, grid, or surface installations, this standard suspension method is widely used

STRAP SUSPENSION

Exclusive to SABIN, our strap and cam buckle system allows for additional color customization and enhanced design aesthetics. Our straps are made from strong recycled polyester webbing.

DIRECT TO GRID

This technique involves attaching baffles directly to standard or tegular ceiling grids using specialized clips, brackets, or felt features, ensuring a secure fit and a clean, unobtrusive appearance.

DIRECT TO STRUT

This system allows for precise, secure attachment of acoustic baffles directly to strut infrastructure.

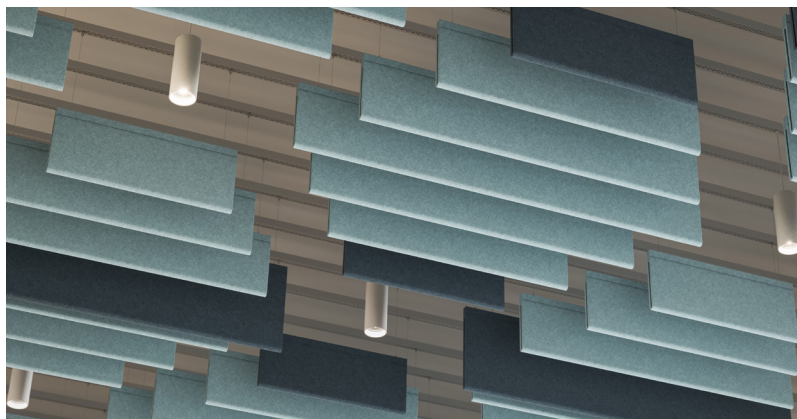

THREADED ROD

Rigid, strong suspension for high ceilings, ensuring stability and precise alignment for even the largest installations

SURFACE MOUNT

Sleek, space-saving option for low ceilings, offering easy installation and a minimalist look
